Re: **Guidance Related to Hand Sanitizer on School Buses**

This guidance provides updated direction about the presence and use of hand sanitizer on school buses during the pandemic. To address safety needs during an outbreak of infectious disease, the New York State Departments of Transportation, Education and Health provide this joint guidance which shall remain in effect during the period of the Disaster Emergency declared per Executive Order 202 (related to the COVID-19) Emergency.

For School District Staff, Parents and Other Stakeholders:

As a result of the COVID-19 pandemic, and as students in NYS get ready to go back to school, school districts will have the authority to install hand sanitizer dispensers on buses as well as allow students and district staff to have personal-size quantities while aboard the bus.

Installation of such dispensers will only be allowed in the area of the driver and must be secure to withstand any sudden stop or impact. The dispenser will not block any aisles and will not present any obstructions to passengers getting on and off the bus. The sanitizer will be ethanol-based, and the dispenser can be no larger than 40 ounces. Students and personnel on the bus will also be authorized to carry personal-size bottles of sanitizer, whose contents should not exceed 8 ounces in volume. These should be secured when not in use.
