

Fall 2024

Professional Development Courses

All courses are offered online ONLY

Deadline to apply for Fall 2024 courses: August 20, 2024 (classes begin 8/26/24)

CEP 50 Psychological Foundations of Education

This course is designed to engage students in the field of Educational Psychology and its contributions to classroom teaching and learning. We will explore thinking, learning, relationships, culture, background and experiences and how these relate to teaching and learning. Through lectures, discussions, and interactive exercises, we will explore the dynamic relationship between students, the teacher, and the learning environment. Discussion will focus on practical applications of technology, particularly as used in classrooms. There are s

objectives: (1) Assure some basic familiarity with computing technology and its common uses in the classroom; and (2) encourage a perspective toward viewing classroom technologies contextually.

CEP 521 Mental Health Counseling

This introductory course provides an overview of mental health counseling as a profession. The texts and assignments are designed to introduce students to the field. Core topics include: history and current trends of counseling, mental health counseling sites and work settings, role of diagnosis and counseling theories, community interventions and outreach, professional issues, and ethics. The eight core areas of the Standards of Practice for CACREP (Council for the Accreditation of Counseling and Educational Programs) also will be briefly examined: human growth and development, social and cultural foundations, helping relationships, career development, group work, appraisal, research and program evaluation, and professional ethics. Emphasis is on multicultural competence and

social justice advocacy as well as awareness of personal characteristics and strengths needed to be an effective counselor are also explored in this class.

CEP 530 Introduction to Meta Analysis

This course targets graduate students who are preparing for their research projects using meta-analysis. This course aims to acquaint graduate students who are preparing for a research project in social, psychological, and/or educational fields with practical knowledge and skills in the applications of meta-analysis. Prerequisite: Permission of instructor or some familiarity with regression analysis

CEP 532 Understanding Stat Research

The purposes of this course are to understand the reasoning and methods upon which quantitative research is conducted and to interpret and critique research studies involving quantitative data. This course is designed for "consumers" of empirical research.

LIS 503 Archives & Records: Practice/Principals

This course is a survey of the principles and practices of archives and records management. It will address the decisions archivists and records managers make while adhering to professional standards, values and ethics. We will discuss how the fields of archives and records management complement each other, how they differ, and how they function within the larger field of information science and with allied professions. We will also address how archival practice informs and is informed by society, emphasizing the history and development of records and recordkeeping systems and the institutions and communities responsible for them. Through lectures, foundational readings, discussion, independent research, and hands-on practice, students will learn how archivists and records managers apply complex theoretical concepts in their work to preserve and provide access to materials.

LIS 503 Equity, Diversity, Justice, and Inclusion in LIS

This course focuses on issues related to equity, diversity, justice, and inclusion in the field of library and information science.
