

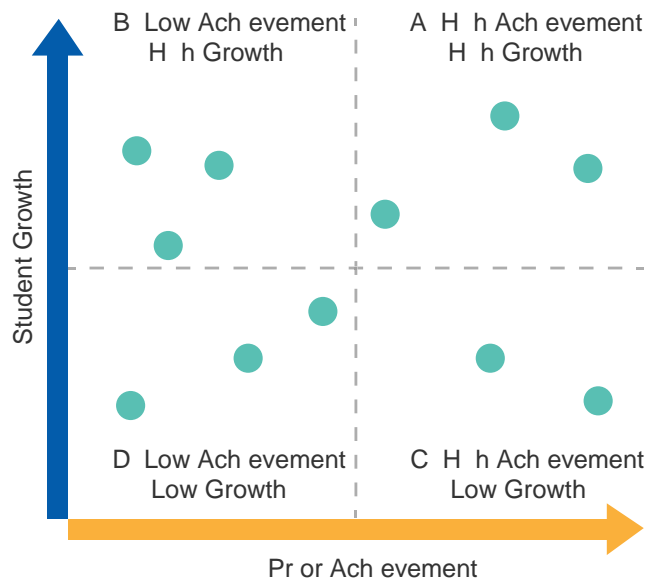

Figure 1. Student Growth and Prior Achievement

How do we Measure Student Growth

1. The percentage of students who score at or above the state standard on the state assessment in a given year compared to the percentage of students who score at or above the state standard on the state assessment in the previous year.

1. The percentage of students who score at or above the state standard on the state assessment in a given year compared to the percentage of students who score at or above the state standard on the state assessment in the previous year. *for advisory purposes only*
